## Prefácio da Primeira Edição

Eu comecei minhas primeiras tentativas de transcrição do manuscrito MS Sloane 3189, "Liber Sextus et Sanctus", ou simplesmente "Loagaeth", em 2005, pesquisando sobre o tema do sistema angélico da magia enoquiana, o que me levou ao manuscrito.

Este trabalho árduo de transcrição foi retomado em 2010, entre momentos de pausa e retoma (equilibrar a investigação e a vida pessoal, especialmente quando estão envolvidas responsabilidades financeiras, é um sério desafio), até que, recentemente, decidi voltar novamente ao meu trabalho com o manuscrito, incentivada pelo conhecimento que obtive das potencialidades de análise de texto do programa REGEX, e pelo contacto com o plugin REGEXtractor, através da aplicação Notepad++, por já ter quase terminada a minha transcrição do manuscrito.

Decidi utilizar o plugin REGEXtractor, através da aplicação Notepad++, na tentativa de encontrar possíveis conjuntos, ou grupos, consistente de letras na minha transcrição e, assim, ajudar na identificação de padrões específicos no manuscrito Loagaeth a fim de auxiliar o estudo de suas características linguísticas e obter uma maior inteligibilidade do seu conteúdo. Os resultados foram surpreendentes.

Para isso utilizei ficheiros de texto simples de todas as permutações e combinações possíveis das letras do alfabeto de A a Z (excetuando as letras U e W, porque estão ausentes no manuscrito MS 3189), de comprimento de duas a seis letras que encontrei em:

<https://beamtic.com/permutations-alphabet>

Transformei esses ficheiros ou listas de palavras na vertical, com a ajuda de dois programas o EmEditor e o NoteTab Pro (os únicos programas que consegui encontrar para me auxiliar na minha tarefa, uma vez que os programas de processamento de texto habituais simplesmente congelavam ou rachavam durante o processo), num ficheiro de texto simples, substituindo a letra U pela V e eliminando a letra W, eliminando os elementos repetidos ao ordená-los de A-Z e colocando as letras em maiúscula.

Utilizei esses ficheiros, divididos em porções menores por meio de um outro programa, o "Text File Splitter", no plugin REGEXtractor presente na aplicação Notepad++ à minha transcrição do manuscrito.

Devo acrescentar que o resultado alcançado pelo plugin foi astronómico, tendo tido também necessidade de me recorrer de um outro programa, o "XML Splitter", para poder trabalhar com os dados obtidos. O uso de expressões regulares, nalguns recursos dos programas de análise de texto que já mencionei, o NoteTab Pro e o EmEditor, de procura e extração de informação, ajudaram na análise e obtenção dos resultados da pesquisa feita pelo REGEX de grupos consistentes de letras na minha transcrição.

Assim, este trabalho de pesquisa não pretende fornecer quaisquer informações básicas sobre o manuscrito MS Sloane 3189, *Liber Sextus et Sanctus*, *Liber Loagaeth*, ou a sua importância no campo de estudo do esoterismo, entre outros campos de estudo, tais como: quando e onde o manuscrito

foi descoberto, o seu contexto histórico e quaisquer pesquisas ou estudos anteriores relacionados a ele.

A minha transcrição do manuscrito original consistiu no registo das letras tais como aparecem na caligrafia de E. Kelley, ou Kelly, nas imagens a preto e branco, de baixo valor digital disponíveis na Internet, uma vez que o acesso ao manuscrito original está sob a proteção da Biblioteca de Londres, e só acessível mediante autorização prévia e pagamento de um valor monetário, assim como a obtenção de imagens de alta resolução digital necessitam também de autorização prévia e têm um custo extremamente elevado. Não compreendo por que a Biblioteca de Londres disponibiliza ao público, online e gratuitamente, o manuscrito Sloane 3188 e não disponibiliza, da mesma forma, o manuscrito 3189 - *Loagaeth*.

Deste modo, infelizmente pela impossibilidade de confrontar a minha transcrição com imagens de alta resolução digital do manuscrito original, a minha transcrição contém lacunas e letras repetidas em determinados grupos de letras que, por não ter a certeza de qual a letra que E. Kelley escreveu, se apresentam como sugestões minhas na intenção de as confrontar com outros casos de grupos de letras iguais, no final do trabalho de transcrição realizado, em comparação com o maior número de casos encontrados. Tarefa que ainda estou a terminar. Partirei do princípio que, das sugestões de letras, vencerá a que estiver em acordo com o grupo de letras que aparece com mais recorrência.

Devo destacar mais uma vez a ajuda preciosa que o programa REGEX me deu, e está a dar, na superação destes desafios ou dificuldades que encontrei, e encontro, nesta minha tarefa de transcrição e compreensão do manuscrito, que, como referi, ainda não está terminada.

Ana Antão

## **Prefácio da Segunda Edição**

Após a publicação da minha obra "Análise dos grupos de letras em Sloane MS 3189", análise dos grupos de letras, da minha transcrição assente em imagens a preto e branco do manuscrito Sloane MS 3189, que estão disponíveis na Internet, e de ter inquirido, por duas vezes, a Biblioteca de Londres da razão por que não disponibilizavam o acesso público ao manuscrito Sloane MS 3189, tal como disponibilizam

o manuscrito Sloane MS 3188, fui contactada no dia 07 de agosto de 2023 pela Biblioteca de Londres, por correio eletrónico, assinado por Calum Cockburn, "Curator of Medieval Manuscripts", com a seguinte mensagem:

*" Dear Ana,*

*Hope that you are well and thank you for your recent enquiry concerning the digitisation of Sloane MS 3189. The good news is that this manuscript has been recently digitised as part of our Tudor and Stuart Project and is available on our Universal Viewer at the following link:*

*[https://access.bl.uk/item/viewer/ark:/81055/vdc\\_100163611312.0x000001](https://access.bl.uk/item/viewer/ark:/81055/vdc_100163611312.0x000001)*

*The images should be freely downloadable there too .*

*All the best,*

*Calum Cockburn*

*Curator of Medieval Manuscripts"*

A minha alegria foi de tal ordem que em apenas onze dias terminara de comparar a minha transcrição do manuscrito assente nas imagens a preto e branco com as imagens de alta qualidade fornecidas pela Biblioteca de Londres.

A qualidade das imagens permitiu-me reconhecer de imediato alguns erros e lacunas que imediata e prontamente corriji (e que o leitor poderá comparar por si mesmo das minhas duas transcrições publicadas: a anterior a esta e esta, a mais recente e corrigida).

Ainda que tudo decorresse de acordo com as minhas expectativas, me deparei com algumas dificuldades.

A primeira dificuldade de deve à caligrafia de Edward Kelley que é inconsistente e dúbia, que nem mesmo imagens de alta qualidade, a cores, fornecidas pela Biblioteca de Londres, serviram para erradicar todas as dúvidas no que respeita a algumas letras. Na minha transcrição colori a vermelho, e algumas delas coloquei ainda em itálico e/ou rasurei, as letras que se mantiveram dúbias. O leitor poderá por si tentar descobrir outra letra diferente a partir do que eu já fiz (e continuarei a tentar).

Procurei, dentro do possível, identificar as letras corretas, quer comparando com outras letras do manuscrito, quer consultando uma outra obra manuscrita, ainda que incompleta no seu propósito, também sob a custódia da Biblioteca de Londres, e acessível na Internet, o manuscrito Sloane MS 2599.

Serve para concluir que a escrita que E. Kelley usou no livro foi uma escrita de transe mediúnico, e fluente, pelo que, ainda que tenha procurado manter-se fiel ao estilo de caligrafia de secretária (estilo

de caligrafia europeia desenvolvido no início do século XVI que permaneceu comum nos séculos XVI e XVII para escrever inglês, alemão, galês e gaélico)<sup>1</sup>, não deixou de revelar as dificuldades, enquanto médium, de usar uma grafia consistente e clara. A este propósito, devo salientar, que não era intenção de John Dee e de Edward Kelley a criação de uma obra literária que fosse a sua herança, no campo do esoterismo, para a posteridade. O manuscrito, que John Dee intitulou de "Liber Sextus et sanctus" ou "Loagaeth", tinha um propósito claro e bem orientado pelos seres angélicos que o comunicaram aos dois investigadores do oculto: a sua composição no formato das linguagens da direita para a esquerda e na grafia angélica, que fora previamente revelada aos dois em suas sessões anteriores à da revelação do conteúdo do livro, no contexto de um ritual que englobava uma série de artefactos mágicos e as 48 Chaves Angélicas, também elas reveladas anteriormente e que os dois só compreenderam o seu propósito com as indicações das instruções de como utilizar o livro. Para maiores pormenores sobre este assunto o leitor deverá consultar o manuscrito Sloane MS 3188<sup>2</sup> e o livro impresso por Meric Casaubon "A true & faithful relation of what passed for many yeers between Dr. John Dee ... and some spirits tending ... to a general alteration of most states and kingdoms in the world..."<sup>3</sup>.

A segunda dificuldade deve-se ao mau estado de conservação, de degradação e deterioração, do próprio manuscrito. Existem partes que foram eliminadas do manuscrito, por razões que o leitor poderá tentar examinar por si próprio, e que é informação irreparável e para sempre perdida. No contexto do propósito do manuscrito, tal como fora instruído aos dois ocultistas, isto significa que o livro está morto e incapaz de servir de apoio ao ritual a ser levado a cabo segundo as instruções que os anjos revelaram.

Ainda assim, por meio do acesso às imagens de alta resolução do manuscrito, tive a oportunidade de corrigir a minha transcrição e refinar a minha análise dos grupos de letras que surgem no manuscrito que realizei na minha primeira edição. A metodologia foi a mesma, mas agora facilitada pela aplicação da lista dos grupos de letras que foram anteriormente identificados e refinada com outras entradas que só poderia conseguir com a conclusão da minha transcrição.

Se os resultados obtidos na minha primeira edição já são surpreendentes, estes são a luz ou a chave que faltava para a compreensão e entendimento do conteúdo deste manuscrito obscuro e tido por conter uma linguagem divina ou angélica.

**Porto, 17 de agosto de 2023**

<sup>3</sup> *a true & faithful relation of what passed for many yeers betweendr. john dee ... and some spirits tending ... to a general alteration of most states and kingdoms in the world : his private conferences with rodolphe, emperor of germany, stephen, k. of poland, and divers other princes about it ... : as also the letters of sundry great men and princes ... to the said d. dee / out of the original copy written with dr. dees own hand, kept in the library of sir tho. cotton, kt. baronet ; with a preface confirming the reality (as to the point of spirits) of this relation ... by meric casaubon ...* dee, john, 1527-1608., casaubon, meric, 1599-1671., kelly, edward, 1555-1595. london: printed by d. maxwell for t. garthwait, 1659. em: <https://quod.lib.umich.edu/cgi/t/text/text-index?c=eebo;idno=a37412.0001.001> (consultado em 17-08-2023).

## Prefácio da Terceira Edição

Ainda em revisão pela comparação com a transcrição realizada por Kevin Klein na sua obra *"The Complete Mystical Records of Dr. John Dee: A 3-Volume Set: Transcribed from the 16th-Century Manuscripts Documenting Dee's Conversations with Angels Paperback – June 8, 2020"*.<sup>4</sup> Também com a de Peterson<sup>5</sup> e com a de Cliff Wigtil<sup>6</sup>.

A caligrafia de E. Kelley: os "N" e os "A"... Kevin interpretou-os como sendo a letra "U"; por vezes os "N" com os "R" também.

Algumas letras que estão a vermelho indicam não dúvidas em relação à letra em si, mas a sua caligrafia particular no manuscrito.

Optei como metodologia fotocopiar cada tabela da transcrição do Kevin e compará-la com a minha riscando letra por letra por meio de uma esferográfica (o velho método). Desta forma, consegui criar pouca margem para lapsos e falhas.

<sup>131</sup> no quadrado 14 a letra "m" tem um ponto em cima, sugerindo a leitura: "mi" (duas letras, a "m" e a "i"); poderá ser uma marca intencional ou não intencional, o que, assim, será apenas um ponto em cima da letra "m".

<sup>132</sup> phadanzvreh<sup>131</sup>acheldaxcladexcoapvlzadahnodanvagaoxar (o 11º quadrado está rasurado, parecendo ter sido a letra "h" escrita e emendada para ser a letra "g", ou vice-versa; o 12º quadrado está rasurado estando a letra "h" escrita por cima da letra "a")

<sup>133</sup> o 48º quadrado tem dois "l", o que totaliza 50 letras nessa linha

<sup>254</sup> nota: ver nota anterior.

<sup>255</sup> nota: ver nota anterior.

<sup>256</sup> nota: esta palavra não está visível em sloane 3189, 1c37 devido à margem estar danificada.

<sup>257</sup> nota: ver nota 243

<sup>258</sup> nota: ver nota anterior apenas para sloane 3189 e 1c37.

<sup>259</sup> nota: ver nota 243, também em sloane 2599 as palavras **se q**vap estão juntas **seq**nap.

<sup>260</sup> em sloane 3188 e 2599 **natos**m, poderá também ser **natos** **n**i ou **natos** **v**i ou **natos**m*i* em 3189 e 1c37

<sup>261</sup> nota: em sloane 3188, 3189 e 1c37 há uma indicação de que as duas palavras formam uma só. em sloane 2599 as duas palavras aparecem juntas: **ozmazax**.

<sup>262</sup> **games**

<sup>263</sup> nota: em sloane 3188, 3189 e 1c37 existe uma letra **i** em cima da letra **g**, que não existe em sloane 2599, o que parece indicar uma grafia alternativa ou como deverá ser lida a palavra

<sup>264</sup> nota: ver nota 243.

<sup>265</sup> nota: ver nota anterior.

<sup>266</sup> **o**iso – 3188 e 2599

<sup>267</sup> nota: ver nota anterior, exceto para sloane 2599.

<sup>268</sup> nota: ver nota anterior.

<sup>269</sup> nota: ver nota anterior.

<sup>270</sup> nota: em sloane 2599 o grafismo da última letra desta palavra é o de um **z**: **anqz**. nos restantes manuscritos a sua grafia não é clara, sendo mais aparente em sloane 3189 e 1c37, podendo indicar ou a letra **e** ou a letra **z**.

<sup>271</sup> nota: **aly**boh (ou **ah**boh em 3189) em sloane 3189, 1c37 e 2599. em 3188 **ali**boh

<sup>272</sup> nota: em sloane 2599 **ge**ns.

<sup>273</sup> nota: ver nota 243

<sup>274</sup> nota: ver nota anterior.

<sup>275</sup> nota: ver nota anterior, exceto para sloane 2599.

<sup>276</sup> nota: **no**i em sloane 3189, 1c37 e 2599. **no**x em 3188

<sup>300</sup> nota: esta palavra encontra-se sublinhada/silabada nos manuscritos sloane 3189, 1c37 e 2599: gem-na-pam.

<sup>301</sup> nota: nebth uh em sloane 3188.

<sup>302</sup> nota: esta palavra encontra-se sublinhada com uma nota marginal de dee no manuscrito sloane 3188: “a cópia tinha ...na não consigo conjecturar”. em sloane 3189 e 1c37 só se percebem claramente as letras na. em sloane 2599 está escrito lyna. talvez seja am na, assumindo que o traço mais para baixo da letra que dee, em sloane 3188, assume como sendo um m ser indicativo de um m final; talvez seja ...r na.

<sup>303</sup> nota: esta palavra possui uma letra i em cima da letra g em sloane 3188, 3189 e 1c37, parecendo indicar a forma de pronunciar a palavra: iea.

<sup>304</sup> om-br<sub>A</sub>-cau em 3188

<sup>305</sup> nota: em sloane 3188 vorsafansa

<sup>306</sup> em sloane 3188 acas (em 3189 também poderá ser vcah)

<sup>307</sup> nota: odamach.oh em sloane 3188

<sup>308</sup> nota: lonsugalan em sloane 3188

<sup>309</sup> nota: o sublinhado traçado debaixo de uma letra significa que ela está acentuada no manuscrito; letras a negrito (destacadas ou não) significa que estão capitalizadas no manuscrito
